Highlight: A luxury safari holiday to East Africa must surely be on every traveler's bucket list. The Annual Wildebeest and Zebra Migration is essentially the movement of thousands of animals across the grassy plains of East Africa in search of food and water as the seasons change. There is no start or finish as such but we commonly say the migration goes from the Serengeti Plains in a northwesterly direction towards the famous Masai Mara Game Reserve. Join us to witness the sight of thousands of animals galloping across the plains and fording raging rivers. It is the most spectacular sights we must see in our life!
